Acknowledgments

Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the May 2003 Status of Forces Survey (SOFS) of Reserve Component Members, which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). The SOFS program is conducted under the leadership of Anita Lancaster, Assistant Director for Program Management, and Timothy Elig, Chief of the Survey and Program Evaluation Division.

Policy officials contributing to the development of this survey included: John Winkler, Wayne Spruell, Tom Bush, LTC Ian Ferguson, USMCR, Virginia Hyland, Dan Kohner, Richard Krimmer, COL James Scott, ARNG, and COL Kathleen Woody, USAFR.

DMDC's Program Evaluation Branch, under the guidance of Eric Wetzel, Branch Chief, is responsible for the development of questionnaires used in the SOFS program. The lead developer on this survey was Brian Lappin. In addition, he designed the unique presentation of complex items used in this tabulation volume. He was supported by Regan Klein, Consortium Research Fellow, in these efforts.

DMDC's Survey Technology Branch, under the guidance of James Caplan, Branch Chief, is responsible for converting surveys to HTML for the Web, data collection, and dataset development and preparation for the SOFS program. The lead analyst on this survey was Barbara Quigley, with programming guidance and support from Elizabeth Willis and Laverne Wright and programming assistance from Sally Mohamed of SRA International, Inc. (SRA). Additional programming and editing support was provided by Julisara Mathew, Lindsay Rock, and Eric Odin, Consortium Research Fellows. Data Recognition Corporation (DRC) performed data collection and editing. Velma Seward-Burton provided coordination for printing.

DMDC's Personnel Survey Branch, under the guidance of Barbara J. George, Branch Chief, is responsible for sampling and weighting methods used in the SOFS program. Richard Riemer standardized the sampling and weighting methods that allow repeated surveys of the Reserve components and he applied those methods to this survey. The sample design was optimized using software developed for DMDC by RTI International. Bob Hamilton, Chief of DMDC's Programming Branch, and Carole Massey and Susan Reinhold, from his staff, provided programming support for the sampling and weighting tasks.

Mary Padilla and others from SRA created the Survey Reporting Tool that formatted and assembled this tabulation volume from analyses produced by SAS[®] macros developed by Richard Reimer. A team consisting of Elizabeth Willis and Laverne Wright, Survey Technology Branch, and Lee Howell, Regan Klein, Julisara Mathew, Eric Odin, and Lindsay Rock, Consortium Research Fellows, completed quality control for this tabulation volume.

MAY 2003 STATUS OF FORCES SURVEY OF RESERVE COMPONENT MEMBERS: TABULATIONS OF RESPONSES

Introduction to the Survey

The *Human Resources Strategic Assessment Program* (HRSAP), located at Defense Manpower Data Center (DMDC), consists of both Web-based and paper-and-pencil surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness [USD(P&R)]. These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community—active, Reserve, civilian employees, and family members—on a wide range of personnel issues. The Web-based survey program, known as the *Status of Forces Surveys* (SOFS), provides timely data on active, Reserve, and civilian members. The SOFS Web surveys are short and limited to a few topics. There are nine SOFS Web surveys a year, with three cross-sectional samples of each population—active-duty members, Reserve component members, and DoD civilian employees. The paper-and-pencil surveys are used to obtain data on sensitive topics (e.g., sexual harassment) and from populations who have limited Internet access (e.g., spouses of active and Reserve members).

This report contains tabulations of responses from the first Reserve component SOFS Web survey conducted April 30 to June 12, 2003. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,¹ and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey items follow this introduction.²

Survey Content

The overarching topics covered in the *May 2003 Status of Forces Survey of Reserve Component Members* were satisfaction and retention. Special emphasis was given to past and current experiences with activation and deployment. The survey was subdivided into questions covering the following 12 topic areas:

1. *Satisfaction With Aspects of Military Service* – Aspects of military life and overall satisfaction.
2. *Career Intentions* – Future participation, support for participation, and likelihood of recommending the National Guard/Reserve.
3. *Most Recent Activation/Deployment* – Volunteer status, frequency, duration, and location within the past 24 months, as well as current status.

¹ Details on survey methodology are reported by Riemer and Kroeger (2003) and DMDC (2003).

² Refer to DMDC (2003) to view a screen-shot version of the survey as it appeared on the Web.

4. *Past Activations/Deployments* – Volunteer status, duration, and location of past military operations.
5. *Employment/Student Status* – Civilian work, hours worked per week, and enrollment in civilian school.
6. *TEMPO/Readiness* – Time spent on National Guard/Reserve duties, time away from home, individual and unit preparedness, and level of stress in military and personal life.
7. *Activation Notification/Preparation* – Advance notice of activation, preparations for activation, time spent away from work/school to complete preparations, preferred duration and time between activations, and failure to receive issued items.
8. *Activation Problems* – Employment, income and benefits, and family life problems that could occur or have occurred as a result of activation.
9. *Income Change* – Changes in military compensation and civilian income as a result of activation or deployment.
10. *Health Care* – Coverage, plans kept during activation, costs, and dental preparedness.
11. *Employer Support* – Preparing for activation and advance notice provided to employer.
12. *Background Information* – Reserve component, paygrade, Reserve program, prior service, race/ethnicity, gender, marital status, dependents, and education.

Population and Reporting Categories

The target population for all Reserve component SOFS consists of (1) members from the Selected Reserve who are in Reserve Unit, Active Guard/Reserve (AGR/TAR/AR³; Title 10 and Title 32), Individual Mobilization Augmentee (IMA), and Military Technician programs from the Army National Guard (ARNG), U.S. Army Reserve (USAR), U.S. Naval Reserve (USNR), U.S. Marine Corps Reserve (USMCR), Air National Guard (ANG), and U.S. Air Force Reserve (USAFR), (2) having at least 6 months of service at the time the questionnaire is first fielded, and (3) below flag rank when the sample is drawn 6 months prior to the survey. Results are presented for the total population, and also by a variety of reporting categories. With the exception of Reserve program, respondents are classified primarily by survey self-report to form the reporting categories for the tabulations. If the self-reported data are missing, then DMDC's Reserve Components Common Personnel Data System, at the time of

³ Names for this program vary among Reserve components: AGR/TAR/AR is a combination of Active Guard/Reserve (AGR), Training and Administration of the Reserve (TAR), and Active Reserve (AR).

sampling (typically 6 months before survey administration), is used to impute the subgroup classification. Definitions for the reporting categories follow:

- *Officers* – The Officers subgroup includes warrant officers (W1 – W5) and commissioned officers (O1 – O6).
- *Reserve Program* – *Reserve Unit* is comprised of members from each Reserve component who attend weekend drills with Reserve units. *AGR/TAR/AR* is comprised of members in full-time service from all Reserve components. This category is further divided into those in *Title 10* and *Title 32* programs. *IMA* is comprised of Individual Mobilization Augmentees from the USAR, USNR, USMCR, and the USAFR. Reserve Unit members from the ARNG, USAR, ANG, and USAFR, and IMAs from the USAR and USAFR can also be categorized as *Military Technician*. Military Technicians are tabulated in the Military Technician category and, as appropriate, in Reserve Unit or IMA categories. Self-report data are used only to fill in missing administrative data.
- *Prior Service* – *Prior Service* includes members who have served on active duty, not as a member of the Reserve components, for a cumulative 24 months or more. *Non-Prior Service* consists of members who have not served on active duty for a cumulative 24 months or more.
- *Activated/Deployed* – *Not Activated* includes members who have not been called to active duty in the preceding 24 months. *Activated* includes members who have been voluntarily or involuntarily called to active duty in the preceding 24 months under the provision of 10 USC 12301(a) (Mobilization), 10 USC 12302 (Partial Mobilization), or 10 USC 12304 (Presidential Reserve Callup). Members who self-report that they have been called to active duty at least once in the past 24 months, but that none of their activations lasted more than 30 consecutive days, are in the category *Activated 30 Days or Less*. Members who self-report that they have been called to active duty at least once in the past 24 months for more than 30 consecutive days are in the reporting category *Activated More than 30 Days*. Members who have been activated for more than 30 consecutive days in the preceding 24 months are further divided according to whether they self-report their call(s) to active duty as being *Voluntary* or *Involuntary*. These categories are not exclusive; members who self-report their call(s) to active duty as both voluntary and involuntary are reported in each category. Members who have been activated for more than 30 consecutive days in the preceding 24 months are also divided into deployment categories. *Deployed (CONUS)* includes members who have been called to active duty for duty purposes to a location that would be considered outside normal commuting distance or time from the member's permanent duty station, but was within the contiguous 48 states for the majority of the deployment. *Deployed (OCONUS)* includes members who have been called to active duty for duty purposes to a location that would be considered outside normal commuting distance or time from the member's permanent duty station, and was outside the contiguous 48 states for the majority of the deployment. These categories are not exclusive; members who self-report their deployments

as both CONUS and OCONUS are reported in each category. *Not Deployed* includes members who have been called to active duty to a location that would be considered within normal commuting distance or time from the member's permanent duty station.

- *Employment/Student – Employed Part-time* includes members who work one or more part-time job(s), each of which is 34 hours per week or less; *Employed Full-time* includes members who work one or more jobs at least one of which is 35 hours per week or more; *Student Part-time* includes members who attend vocational or academic school for an equivalent of less than 12 credit hours per semester; *Student Full-time* includes members who attend vocational or academic school for an equivalent of 12 credit hours or more per semester; *Both Employed & Student* includes members who report working at least part-time and are simultaneously a student, at least part-time; and *Not Employed & Not Student* includes individuals who report not having a civilian job and not being enrolled in a civilian school. Active Guard/Reserve (AGR/TAR/AR) members, as defined by administrative data, are excluded from employment and student categories. Survey questions concerning employment are intended for members not in an AGR/TAR/AR program. For this reason, Reserve Unit members and IMAs who mistakenly self-report themselves as AGR/TAR/AR appear as missing data in employment categories.
- *Race/Ethnicity* – Self-report questions are consistent with requirements of the Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity (1997). *Total Minority* includes all persons marking one or more of the races other than White and/or marking that they are Spanish/Hispanic/Latino. *Non-Hispanic Black* includes persons marking only Black or African American and not reporting being Spanish/Hispanic/Latino. *Hispanic* includes anyone reporting being Spanish/Hispanic/Latino, regardless of how they answered the question on race.

Survey Methodology

The survey administration process began on April 18, 2003, with the mailout of notification letters to sample members. This notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. Throughout the administration period, additional e-mail and postal reminders were sent to encourage survey participation. Data were collected on the Web between April 30 and June 12, 2003.

Single-stage, nonproportional stratified random sampling⁴ procedures were employed to ensure adequate sample sizes for the reporting categories. The sample consisted of 71,701 individuals drawn from the sample frame constructed from DMDC's October 2002 Reserve Components Common Personnel Data System. Members of the sample became ineligible if they indicated in the survey or by other contact (such as telephone calls or e-mails to the data collection contractor) that they were not in a National Guard/Reserve component as of the first day of the survey, April 30, 2003 (4.96% of sample).

Completed surveys (defined as 50% or more of the questions asked of all participants are answered) were received from 25,559 eligible respondents. The overall weighted response rate for eligibles, corrected for nonproportional sampling, was 40%. Data were weighted to reflect the population of interest. These weights reflect (1) the probability of selection, (2) a nonresponse adjustment factor to minimize bias arising from differential response rates among demographic subgroups, and (3) a poststratification factor to force the response-adjusted weights to sum to the counts of the target population as of the month the sample was drawn and to provide additional nonresponse adjustments.

Table 1 shows the number of respondents and the portion of total respondents in each reporting group. Also shown are the estimated number of members and the portion of total members in each reporting group. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled as well as differences in response rates.

⁴ In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, members might be grouped by gender and Service (all male Army personnel in one group, all female Navy personnel in another, etc.). Members are chosen at random within each group. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.

Tabulation Procedures

Tabulations for a survey question are shown on a set of facing pages. The text of the question and response options are shown at the top of the even-numbered page, with only the question repeated on the odd-numbered page. To compress the width of columns in the tables, the response options are shown with a number and then that number is used as the column heading for the responses. The central feature of the tabulations is the percentage of members choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding.

Where an item lends itself to presentation as an average, that average is also shown as a number estimate and in a bar chart. The averages lend themselves to a quick scan for reporting groups that differ from other similarly defined groups. Where a true response continuum is available (e.g., number of children or years of service), the mean of that continuum is presented; in other cases, the responses are averages of the numeric scales presented with the response options. Where there is a simple binomial response like yes/no, only one percentage is presented. In this case, the bar chart represents that percentage.

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it is reflecting item nonresponse, and the table notes that “Percent responding are Reserve component members who answered the question.”

Not all questions will apply to every respondent. Where possible, the Web survey is programmed to skip over questions that do not apply to the respondent. For example, Q20 (Are you currently activated?) does not apply to those who have not been activated in the past 24 months. The notation for this question indicates that the “Percent responding are Reserve component members who answered the question and who had been activated in the past 24 months (Q13).”

Not only does the Web survey skip respondents over questions that do not apply to them, but it also asks respondents variations of a question based on responses to prior questions. On this survey, many questions have two versions—one for those who were not activated in the past 24 months and one for members who were activated during this timeframe. For example, Q106 (Are you currently enrolled in a civilian school?) was asked of members who were not currently activated, whereas Q107 (At the time of your most recent activation, were you enrolled in a civilian school?) was asked of currently activated respondents. The notations for Q106 and Q107 indicate the percent responding were “not currently activated” or “currently activated,” respectively.

The survey does not always skip over questions that do not apply to the respondents. In the tabulations, *Does not apply* responses are typically included in the percentages in the *Percent Responding* column. For example, Q10 asked members

to indicate how favorable particular groups or individuals are toward their participation in the National Guard/Reserve. Survey participants can indicate for each group or individual that the question does not apply.

Combining Information From Multiple Items

Tabulations in this volume generally present data for individual survey questions. There are two types of exceptions. The first type of exception is where the results for multiple items are presented on a single set of pages for number of dependents, and race.

- In Q5, members are asked how many dependents they have in each of three age ranges. For this question, the tabulations show the percentage of the reporting category with children in that age range. The averages shown on these pages are based only on those with at least one dependent and, therefore, show the average number of dependents for those who have dependents.
- Race (Q211) is reported in a single set of tabulations. The tabulations show the percentage who responded that they were White, Black, American Indian/Alaska Native, Asian, and/or Native Hawaiian/Other Pacific Islander. Respondents who indicated more than one race are also shown in the percentage of "More than one race marked." For example, if a respondent indicated they were Asian and White, they were counted in the percentages as "Asian," "White," and "More than one race marked."

The second type of exception pertains to constructed scales for employment and economic impact of activation.

- Employment indicators are derived from Q91-Q98 and administrative data and are modeled to be comparable to employment measures used in the U.S. Census Bureau's Decennial Census and Current Population Survey (CPS) (Bureau of the Census, 2002). Two sets of tabulations are presented. In the first set, labor force participation is shown for those in the reporting category. The three categories contain percentages of (civilian) employed, unemployed, and not in the labor market. Those not in the labor market include those who are permanently or temporarily not working or actively looking for work.⁵ The second set of the tabulations show only those in the labor market. That is, the percent responding are members who answered the items and who are in the labor market (civilian employed and unemployed). The unemployment rates shown in these tables are the percent of those who need or want to work and are unemployed.

⁵ Those who have not actively looked for work in the past 4 weeks are considered to be out of the labor market.

- Indicators of the economic impact of activation are derived from Q168-Q181. Changes resulting from activation and deployment in members' military income and family civilian income are shown separately in Q168-Q169 and Q175-Q176, respectively, and as a combined change in Q176.

Margins of Error

The complex sample design required weighting to produce population estimates such as percentages.⁶ This also means that the typical rules of thumb for interpreting how good an estimate is, such as the number of respondents, will overstate the reliability of the estimate. For this report, variance estimates were calculated using SAS[®] PROC SURVEYMEANS (SAS[®] Institute, Inc., 1999).

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the variance around population parameters such as percentages or means and are used to construct margins of error (i.e., confidence interval half-widths). Percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for the percentages in the row is shown. That is, the margin of error is calculated for each response option percentage and the largest of these errors is printed. For each average shown in these tabulations, its margin of error is printed.

Estimates may be unstable based on a small number of observations or relatively large variance in the data or weights. Particularly unstable estimates are suppressed or annotated in these tabulations. The following rules are used:

- "0" indicates that no one in any reporting group selected the response option,
- "NR" indicates the estimate is Not Reportable because it was based on fewer than 30 respondents or the relative standard error was high,
- "NA" indicates the response option was Not Applicable for the reporting category because it was not selected by any respondent in that category,
- no Max ME is printed when all percentages in the row are shown as "NR," and
- no margin of error is printed for an average when it is shown as "NR."

⁶ This differential weighting means that only certain statistical software procedures, such as PROC SURVEYMEANS, correctly calculate standard errors, variances, or tests of statistical significance.

Note. Percent responding are Reserve component members who answered the question. In calculating employment status, an individual must have worked in the past week to be considered Employed, therefore only one-fourth of Reserve Program members without other employment would be considered Employed. Regardless of self-reported employment status, individuals who were identified as AGR/TAR/AR and Military Technicians in the sample frame (November 2002) are treated as AGR/TAR/AR and Employed, respectively.

91. Employment status: Constructed from Q91-Q98 and administrative data to conform to Bureau of Labor Statistics' standards using CPS labor force items.

Note. Percent responding are Reserve component members who answered the question, who were not in an Active Guard/Reserve Program (AGR/TAR/AR), in a full-time National Guard Duty, or serving on State Active Duty (Q2), who were currently activated (Q13/Q20), who, in the week prior to their most recent activation, were employed (Q92/Q94) and working for an employer (Q102c). Average is based on those who did not report they did not need to take time off work to prepare for their activation (Q203).

NR: Not reportable - cell size less than 30 or low precision.

204. For your most recent activation, how much advance notice did you give your civilian employer?

0. Less than 1 day

1. 1-7 days

2. 8-14 days

3. 15-29 days

4. 30 days or more

May 2003 Status of Forces Survey of Reserve Component Members

[RCS: DD-P&R\(AR\)2145](#)
[Exp. 05/23/05](#)

Welcome!

Thank you for your participation. You have been selected to take a survey on your attitudes and perceptions of personnel policies. When you click the Continue button below, you will be asked to:

- Read the Privacy Act Statement if you choose.
- Answer some questions giving us your attitudes and opinions about military life.

Thank you, again, for your time and participation.

PRIVACY ACT STATEMENT FOR STATUS OF FORCES SURVEYS

In accordance with the Privacy Act, this notice informs you of the purpose of the Status of Forces Surveys and how the findings of these surveys will be used. Please read it carefully.

AUTHORITY: 10 United States Code, Sections 136, 1782, and 2358.

PRINCIPAL PURPOSE: Information collected in this survey will be used to report attitudes and perceptions about personnel programs and policies. This information will assist in the formulation of policies which may be needed to improve the working environment. Reports will be provided to the Office of the Secretary of Defense, each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individuals.

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used only by persons engaged in, and for purposes of, the survey research.

SECURITY PROTECTION ADVISORY

WEB SITE PRIVACY: The Department of Defense and Data Recognition Corporation will collect no personal information about you when you visit this Web site unless you choose to provide it yourself. If you supply us with personal information, it will be treated as confidential.

In addition, our system does not enable "cookies," which are files placed on your computer's hard drive in order to monitor your use of the site or the Web. For more information about your privacy rights, please read the Privacy Act Notice at the start of the survey.

This Web site does gather and store certain data from your visit. This non-personal information makes the site helpful to you by recognizing the types of technology you use. The data collected appear below:

1. Your Internet host or domain (for example, "youragency.mil" if you connect from a military domain; "yourschool.edu" if you connect from a university's domain; or "yourcompany.com" if you use a private Internet access account). Other examples of domains are compuserve.com and aol.com.
2. Your Internet Protocol (IP) address (for example, www.compuserve.com, www.aol.com, 122.3.55.34). Depending on your Internet service provider, IP addresses may identify your computer; in other cases, they identify no more than your Internet service provider (such as AOL or Earthlink). This is stored for troubleshooting technical problems.
3. The type and version of the browser and operating system you use to access our site.
4. The date and time you access this site.
5. The pages you visit.

None of this information will be revealed publicly or used to identify you.

ABOUT THIS QUESTIONNAIRE

What is the Status of Forces Survey (SOFS) Program?

- SOFS is a Department of Defense (DoD) personnel survey program that features short, Web-based surveys sponsored by the Under Secretary of Defense for Personnel and Readiness.
- These surveys enable the DoD on a regular basis to quickly and accurately gauge the attitudes and opinions of the entire DoD community – active duty or Reserve component members and spouses, and DoD civilian employees – on the full range of personnel issues.

Why should I participate?

- This is your chance to be heard on issues that directly affect you.

- Some examples of topics include: quality of life, retention, retirement, and satisfaction.
- Your answers on a survey make a difference. For example, results from previous surveys have played an important role in deliberations on pay rate adjustments, cost of living and housing allowances, and morale and retention programs.

How do I participate?

- To participate, you are asked to (1) read the Privacy Act Statement if you choose, (2) verify contact information, and (3) provide us e-mail address(es) so we can notify you when the survey is ready. We would appreciate your doing this step now. To participate now, click the Continue Now button.

How did you pick me?

- We use well-established, scientific procedures to select a sample that represents the Defense community.
- This sampling procedure sets up clusters of people based on combinations of demographic characteristics (e.g., Service, rank, etc.).
- You were selected at random from one of these clusters of people.

Why am I being asked to use the Web?

- Web administration enables us to get survey results to senior Defense leaders faster.

Why are you using a .net instead of a .mil domain to field your survey?

- When the SOFS program was established, a .net domain was chosen for three reasons.
 1. The SOFS operations contractor, Data Recognition Corp., consolidates both Web and paper survey data for DoD and it is more efficient for the Government to collect it at their single site.
 2. This makes it as easy as possible for everyone to access the survey, even from a non-government computer.

Do I have to take the survey in one sitting?

- No, it is not necessary to complete the survey in one sitting. Just click the "Save and Return Later" button and the work you completed will be saved.
- When you return to the survey, merely enter your Ticket Number again. Entering your Ticket Number will bring you to the place in the survey where you had stopped.

Why does the survey ask personal questions?

- The Defense Manpower Data Center (DMDC) traditionally reports not only overall results, but also results by race/ethnicity, paygrade, etc.
- To complete these analyses, we must ask respondents for this type of demographic information.
- Analyzing results in this way provides Defense leaders information about the attitudes and concerns of all subgroups of personnel (e.g., enlisted/officer, males/females) so that no groups are overlooked.
- Sensitive questions are sometimes also asked about topics like personal finances. Such information will be used to improve personnel policies, programs, and practices. As with all questions on the surveys, your responses will be held in confidence.

Will my answers be kept private?

- Your privacy will be safeguarded in accordance with the Privacy Act of 1974 (Public Law 93-579).
- Only group statistics will be reported. Individual data will not be reported.

Will I ever see the results of the survey?

- This survey's briefings and reports will be posted on the following Website:
<http://www.dmdc.osd.mil/surveys/>
- When you complete a survey, you can request to be notified by e-mail when results are posted on the Web.

What is DMDC?

- DMDC maintains the largest archive of personnel, manpower, training, and financial data in DoD. It also conducts Joint-Service surveys and operates the Status of Forces Survey Program for the DoD. To learn more, visit the DMDC web site:
<http://www.dmdc.osd.mil/>

How do I know this is an official, approved DoD survey?

- In accordance with DoD Directive 8910.1, all data collection in the Department must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for the SOFS is DD-P&R(AR)2145, expiring 05/23/05.

What is ADSurvey@osd.pentagon.mil?

- The official e-mail address for communicating with active duty members about Status of Forces Surveys. The name is short for Active-Duty Survey.

How to Contact Us

- If you have questions or concerns about this survey, you have three ways to contact the Survey Operations Center:
- Call 1-800-881-5307
Or
- E-mail us using the following link: ADSurvey@osd.pentagon.mil
Or
- Send us a fax at 1-763-268-3011

MOST RECENT ACTIVATION/DEPLOYMENT

Please read these definitions carefully. When you see these words later in the survey you can also click on the words “activated” and “deployed” to recall these definitions.

In this survey, the term “activated” refers to the voluntary or involuntary call to active duty of a Reserve component member under the provision of 10USC 12301(a) (Mobilization), 10USC 12302 (Partial Mobilization), or 10 USC 12304 (Presidential Reserve Callup). It does not apply to members in an Active Guard/Reserve Program (AGR/TAR/AR), members serving in a full-time National Guard Duty, or members serving on State Active Duty.

In this survey, the term “deployment” refers to the movement of a member, or unit, for duty purposes to a location that would be considered outside normal commuting distance or time from the member’s permanent duty station. Deployments can be to a location within the contiguous 48 states (CONUS) or to a location outside the contiguous 48 states (OCONUS).
